OBJECTIVE

Trip hazard grinding

Payment Type: ½ upon start and ½ upon completion

IMPORTANT NOTE

Start date: _____

Completion: _____

° SIDE-WALK & CARPORT GRINDING – (Level 3/hazard traffic area) - After examining the area of the trip hazards, I would have to rate these trip hazards as being a third-generation concrete mason in the field for 26 years a C- on the simple grading scale we use. This is a scale A-D (D is complete attention needed to prevent injury following possible legal action). The rating of (C-) is a condition that can turn into a huge liability quickly. We have an opening to take care of this right away. This prep and grind down will be done professionally and will be done to prevent any injury or legal action in the present. We use diamond blades and 7-10" grinding machines to start and complete the process. We are a business that safety is our top priority and the area will be secured from outside residents with cones and will be clean during the process always. Prep and grind (10) major areas of concreted walkway that are trip hazards. This includes use of machine/labor.

Summary of Price: (10 qty) standard walkway width of walkways. 10@ \$250.00 = \$2500.00

If you decide to go with us we will apply \$300.00 to the repair of the pool.

This opening for booking the project will expire July 19th, 2018.

Thank you I look forward in hearing from you.

Sincerely,

Bruce W.
